(54) Title: EPITOPES OF PAI-1

(57) Abstract: The invention belongs to the field of cardiovascular and thromboembolic diseases or cancer and related diseases. The invention relates to proteins, peptides comprising specified epitopes of plasminogen activator inhibitor type-1 (PAI-1) and nucleic acids encoding said proteins or peptides. The invention further relates to methods of screening for substances capable of inhibiting said PAI-1, substances identifiable with said method and pharmaceutical compositions comprising said substances.
